ABOUT ME

Sixteen years of creating experiences for world-class consumer brands and video games.

My career has been shaped by a multidisciplinary education and the drive to become the best professional I could be on every milestone that I hit. This has led me to gain expertise in a wide range of disciplines like art direction, design, illustration, animation, photography, and, recently, undertaking filmmaking.

My ability to combine strategic thinking, creative conceiving, user experience, and design with deep understanding of visual language and technology allow me to carry any project from ideation to execution turning complex ideas into sophisticated and entertaining experiences. I'm always looking for a challenge that will allow me to develop my skills as a creative and push the standards and boundaries of any medium that I work in.

I have always had a knack for teamwork. I thrive in building and nurturing teams and talent, being a pillar on which colleagues can rely upon and look up to for direction as well as keeping myself humbled and surrounded by people who can teach and challenge me allowing me to continue curbing my skills and knowledge day after day.

GAMES DEVELOPED OR CURRENTLY IN DEVELOPMENT
